Step by step guide for cashier logic

1. Login page for the cashier

2. Station list with numbers, clicking brings to the next page.

3. Pumps list with the prices, clicking on any of them brings to the next page.

4. Payment details page, need to choose by dram or by litre option and input the amount the customer wants. Continue button for accepting it and to go on the next page.

5. Payment methods page, need to choose which method wants the customer to proceed the payment by clicking on one of them. Տեսնել ավելին is for if there are many methods and shows the list.

6. Payment procedure page shows the details and has cancel button for 3-5 seconds(configurable), if the time passes then cancel button disappears and we proceed the payment. If its correctly done we show success, if not we show failure and info under it with error code/info, at the bottom of the page there are buttons Try again and fuel without payment.
Try again goes to repeat the process from the previous page, second one goes to the admin password page, if password is input and correct then we proceed without payment and this payment details go to the page "Not paid loads".

7. Transaction history button on the top right of the page, a list with details.

8. Not paid loads page, shows the list, in the left side there are choose buttons, it is possible to choose and proceed the payment to print the checks(ՀԴՄ). Print button opens methods - Cash or other, if cash we print the check, if other we just make it done, cause other method does not need to print anything.

9. Configs page, ՀԴՄ configs are the details of need configs for it, there is "+" button for adding new POS. There are 2 types of it - cashier POS and outdoor POS. Then price and discount, can change the fuel type and input the price and the discount if need to change. Other configs can be added. Then are the

configs for the number of loads to keep in list of transaction history and not paid loads sections.

10. Info page. 3 sections.
    How to use.
    How it works.
    What to do if smth goes wrong – step by step guide.
